**Summary**

The main goal of the project is to make a production technological line for the production of natural thermal and sound insulation from sheep wool. The production of our insulation is environmentally friendly and the insulation is the only one on the market that is 100% natural and meets all the attributes of modern insulation. Sheep wool becomes a waste in Slovakia every year, which has been a problem for several decades. The company can process the annual sheep wool production in Slovakia and remove the environmental burden. After many years of research and development in the field of sheep wool processing and construction, they have developed insulation that helps people live healthier and better lives in harmony with

nature.

**Sector code**

Environment and Climate Change

**Sub sector code**

Waste/Recycling

**Project target group**

End beneficiary	End beneficiary sub-group	Intermediary	Intermediary sub-group
Age-related	Young adults (18-29)	-	-
Business-related	Entrepreneurs	-	-
General	General public	-	-

**Policy markers**

Gender equality	Non-applicable
Roma inclusion and empowerment	Non-applicable
Social inclusion of vulnerable groups other than Roma	Non-applicable
Anti-discrimination	Non-applicable
Transparency and anti-corruption	Relevant
