+ <input type="checkbox"/> PA01 Outcome 1	Increased competitiveness of Slovak enterprises within the focus areas: Green Industry Innovation and Welfare Technology and Ambient Assisted Living technologies
+ <input checked="" type="checkbox"/> PA03 Outcome 2	Education and Employment potential enhanced in Slovakia in Green Industry Innovation and Welfare and Ambient Assisted Living technologies

Summary

The project focuses on the aims related to the education through ICT using innovative methods and modern didactic approaches. The specific objectives of the project include promoting synergies between research and innovation activities in the field of "green innovation" and promoting modern technologies as drivers for improving education and youth policy. The project is focused on institutional cooperation between the Secondary Vocational School of Gastronomy and Services and enterprises in Slovakia and Norway to increase the quality and importance of education and vocational training in Slovakia. The main concept of the project is the development of training and educational organisations in order to diversify capacity in the digital field. The project aims to ensure the implementation of activities that mediate the integration of pupils without distinction and create conditions for inclusive education. The modernization of individual classrooms will create a suitable learning environment for all students and their full participation in education without distinction. The individual classrooms will be equipped with modern technologies and devices to provide inclusive education and development of disadvantaged groups in multiple knowledge aspects:

- Implementation of equal treatment (non-discrimination), as every student of the school of the different field will have access to practical training in the modernized classrooms;
- full participation of pupils with specific needs in education;
- support and motivation of pupils with specific needs to enter the labour market, obtaining the required profile of a graduate of the selected field of study and apprenticeship;

Within the implementation of the submitted project, the applicant will ensure the economy, efficiency and effectiveness of the use of the proposed expenditures. The project expenditures will be reasonable - will correspond to the usual prices at the place and time and meet the needs of the project.
